

Introducing the Aquabot Extreme Series™

CLEAN CONQUERED

aquabot® *i2*

INNOVATION MEETS AFFORDABILITY

The smart design of the i2 makes it an ideal cleaner for your above or in-ground pool. Affordably priced and stocked with new innovative features unprecedented in its class. Aquabot's industry-leading pumps come standard on the i2 and circulate up to 85 GPM. For better water mixing and a cleaner pool. Two extra-large, top-loading filter baskets hold a massive 268 cubic inches of dirt and debris. And power washing jets and agitating brushes loosen stubborn dirt and bacteria to get your pool sparkling clean. The Aquabot i2 will cut down your water, chemical and energy usage. And with better performance than other cleaning methods. For pool maintenance that's cheaper, simpler and better than ever.

Coverage:	8000 sq. ft./per hour
Gallons Per Minute:	80-85
Cost of Operation:	\$0.05 (per cleaning)
Cleaning Time:	1-2 Hours
Filter Capacity:	268 (2x134) Cubic Inches

ANTI-TANGLE SWIVEL

For seamless cleaning performance, the i2 has an all new Anti-Tangle Swivel. Time-consuming and frustrating tangles are a thing of the past. Covering 8000 square feet per hour, the i2 cleans your pool efficiently without any hang-ups.

NEW MICRO-FILTRATION BAGS

Achieve the best filtration available with the i2's micro-filtration bag inserts. Easy to install, clean and remove, these filter bags can be added to the standard filter baskets to capture small debris, algae and bacteria down to 2 microns in size.

3 YEAR WARRANTY

The i2 takes affordability to the next level. Most entry-level robotic cleaners only have a 1-year warranty. A reasonable priced cleaner isn't very reasonable if it just breaks down after a year. Backed by a 3-year warranty, the i2 is built to last.

NEW POWER WASHING JETS

Powerful new jets have been added to the underside of the i2 to blast away stubborn dirt, debris and bacteria. Concentrated micro-jets work in conjunction with agitating brushes to scour all the surfaces of your pool, for your cleanest pool yet.

HIGH EFFICIENCY OPERATION

The i2 can save you up to 30% on your total chemical usage alone. And is 93% more efficient than a standard main pool filter system. Running on an ultra-efficient DC motor, the i2 uses only 150 watts, so each cleaning costs less than a nickel.
